

UK PLASTIC PACKAGING TAX STATEMENT

April 2022

From 1 April 2022, the UK Government is implementing a new tax on plastic packaging to incentivise the use of recycled material in the production of plastic packaging.

Any business that imports plastic packaging or products contained in plastic packaging into the UK or manufactures plastic packaging in the UK will be liable to register for Plastic Packaging Tax (PPT) and pay any tax due if they exceed the threshold of 10 tonnes of plastic packaging per annum.

At Victor Stationery, we have systems and processes to collate data for compliance, pricing, contracts, and supply chains. We maintain records of how much plastic we use and monitor how much we import into the UK; this ensures our compliance and forms part of our plastic pledge to minimise and eliminate plastic from our business. We can confirm that, even with import volume fluctuations, we are well below the 10 tonne annual limit.
